

PROMIS 4.17 Training

[HD Prescription Extract from Cerner](#)

Background:

This release will include the extraction of HD Prescriptions entered in Cerner and displayed in PROMIS. Any conflict of prescription dates between PROMIS and Cerner will be ignored.

Navigation:

PROMIS 4 > Patient Overview > Renal > Dialysis Prescriptions

Functionality:

HD prescriptions extracted from Cerner will now be displayed on the front-end in PROMIS. A label of “Autoloaded” will be added to these prescriptions on the prescriptions summary page.

A section for “Autoloaded Notes” will also be added to the module to show additional information from Cerner. As mentioned above, any conflict of prescription dates between PROMIS and Cerner will be ignored.
