

PROMIS 4.18 Training

Kidney Transplant Readiness Report

Background:

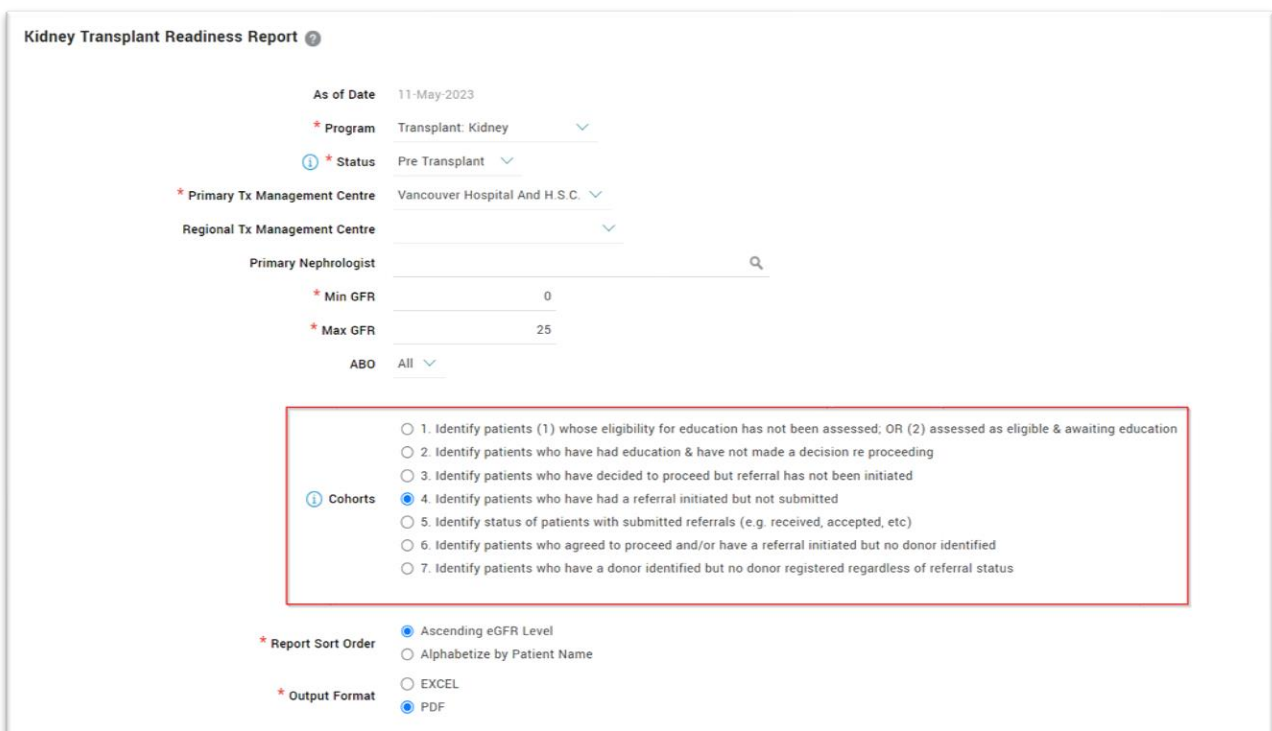

Some users are not very familiar with Excel filters and in this release, we will add some cohorts to allow users to customize and filter the report based on some criteria.

Navigation:

PROMIS 4 > Reports > Centre Reports > KY Transplant Readiness Report

Functionality:

- The Kidney Transplant Readiness Report will be enhanced to include cohorts in the parameters screen. There are seven cohorts in total that allow you to filter your report based on the cohort you select. Please note that selecting a cohort is not mandatory.

Kidney Transplant Readiness Report

As of Date: 11-May-2023

* Program: Transplant: Kidney

* Status: Pre Transplant

* Primary Tx Management Centre: Vancouver Hospital And H.S.C.

Regional Tx Management Centre:

Primary Nephrologist:

* Min GFR: 0

* Max GFR: 25

ABO: All

Cohorts

- 1. Identify patients (1) whose eligibility for education has not been assessed; OR (2) assessed as eligible & awaiting education
- 2. Identify patients who have had education & have not made a decision re proceeding
- 3. Identify patients who have decided to proceed but referral has not been initiated
- 4. Identify patients who have had a referral initiated but not submitted
- 5. Identify status of patients with submitted referrals (e.g. received, accepted, etc)
- 6. Identify patients who agreed to proceed and/or have a referral initiated but no donor identified
- 7. Identify patients who have a donor identified but no donor registered regardless of referral status

* Report Sort Order: Ascending eGFR Level
 Alphabetize by Patient Name

* Output Format: EXCEL
 PDF

- If you hover your mouse over the  bubble, you get a brief description of each cohort as shown below.

1. Transplant education eligibility not recorded OR transplant education eligible and no transplant education recorded
2. Transplant education given, no decision by patient to proceed
3. Agreed to proceed, no referral initiation recorded
4. Referral initiated but not submitted
5. Status of patients with referrals submitted, received, accepted, pt seen
6. Referral initiated with no LD identified by patient
7. Potential LD identified and no LD registered

- If a cohort is selected, the report generated will be based on the cohort criteria and the selected cohort itself will be displayed on the report.
