

PROMIS 4.20 Training

[HHD NxStage Prescription Enhancements](#)

Background:

Home Hemo Dialysis NxStage Prescriptions will be sent to PROMIS daily from CST. This requires a few enhancements to the HHD Prescription form in PROMIS.

Navigation:

PROMIS 4 > Patient Overview > Renal > Dialysis Prescriptions

Functionality:

In the form to add a new HHD Prescription, the following changes have been made:

- Two new items have been added to the *Dialyzer* drop-down list:
 - CAR-124-C
 - CAR-172-C
- One addition has been made to the *Anticoagulation Drug Protocol* drop-down list:
 - Dalteparin
- The character limit of the *Cartridge* field has been increased to 15 characters.
