

PROMIS 4.20 Training

[Living Donor Follow-up Vists in Legacy](#)

Background:

Currently, when a living donor gets a surgery date, it automatically creates up to 25 years of visits. This is linked to the follow up letter generation as well. The number of years poses a problem in case of a young patient (for example a 20 year old would only be 45 years of age after 25 years and will likely need follow-up visits.)

Navigation:

PROMIS 4 > Classic > Legacy BCT

Upcoming Changes:

The number of follow-up visits that are automatically created for a living donor will now be for 80 years.
