

PROMIS 4.20 Training

[TB Screening Tracking Report](#)

Background:

The new TB Screening Tracking Report is being introduced to help dialysis units track new chronic dialysis patients that need TB screening.

Navigation:

PROMIS 4 > Reports > Centre Reports > Centre Reports > TB Screening Tracking Report

Functionality:

- The TB Screening Tracking Report parameters include the start and end date ranges, *Dialysis Type*, *Dialysis Centre* and *Primary Management Centre*. Click on *Run* at the bottom right of the screen to generate the list.
- For *Dialysis Type* and *Dialysis Centres*, there is an option to select all modalities and all centres respectively.
- You must select either a *Dialysis Centre* or a *Primary Management Centre* or both. Patients listed on the report will be based on their current active dialysis centre.
- The *Start Date*, *End Date* and *Current Dialysis* fields are mandatory.
- Patients whose first chronic dialysis start date (associated with the current Provincial Renal Agency program) falls within this report's *Start Date* and *End Date* parameters will appear on the report. If the patient first started chronic dialysis before or after the date ranges in the parameters provided, they will not appear on the report.
- The list generated can be exported to Excel by clicking on the *Excel Report* button. The list could also be filtered by column by using the filter boxes above each column.
- The generated list shows information related to a patient's *TB Assessment Date*, *Chest Xray Order Date*, *IGRA Order Date* and *BCCDC Alerted Date/Time*.

TB Screening Tracking Report

* Start Date 01-Jan-2022 * End Date 30-Oct-2023 * Current Dialysis Type HD

Dialysis Centre Abbotsford Regional Hospital Primary Management Centre Abbotsford Rgnl. Hosp. & C.C.
