

PROMIS 4.21 Training

Donor Allocation

Background:

All Donor modules will be moved into PROMIS 4 in this upcoming release including the Allocation module.

Navigation:

PROMIS 4 > Donor Overview > Allocation >

Functionality:

The Allocation module is available for deceased donors.

The screenshot displays the 'Kidney Outgoing Offers' section for a deceased donor. It includes a summary table and a detailed offer table.

| DONOR TYPE | DONOR LOG # | REFERRAL DATE | DONOR STATUS | REGISTERED IN CBS | DONOR SEROLOGY IN CBS | IMMUNOLOGY IN CBS | CROSS CLAMP TIME |

The allocation can be run when the *Registered in CBS*, *Donor Serology in CBS* and *Immunology in CBS* fields are set to Yes.

Multiple organ offers can be made from the Allocation module in PROMIS 4.

The ranking of a recipient on the allocation list is important and offers should be made based on the rankings.

The *Preview Allocation* button is used to preview the allocation list from CBS before running it.

The *Run Allocation* button allows you to retrieve the latest state of the allocation list. Re-running an allocation will not work if an organ is shipped.

After an offer is made, the offer can be accepted, withdrawn or cancelled in PROMIS.

Any errors with CTR written on the top are CBS errors.
