

PROMIS 4.21 Training

Living Donor Follow-up

Background:

All Donor modules will be moved into PROMIS 4 in this upcoming release including the Living Donor Follow-up module.

Navigation:

PROMIS 4 > Donor Overview > Results > LD Follow-up

Functionality:

- LD Follow up module is for capturing the LD follow up letter generation. The letter sent, and letter sent date and generate a letters functions are included.
- In order to create the first four periods, *Transplant Date* must be entered in the *Procedure* tab of *Referrals*. This is the trigger point for PROMIS to generate 4 periods in LD follow up.
- The four periods are *Discharge, 1 Month, 6 Months* and *1 Year*.
- Every year on January 1st, PROMIS will review the current status of the Living Donor, and if Living Donor status is still active, then the next period will automatically be generated up to 80 years.
